DIGITAL EXPOSURE REPORT

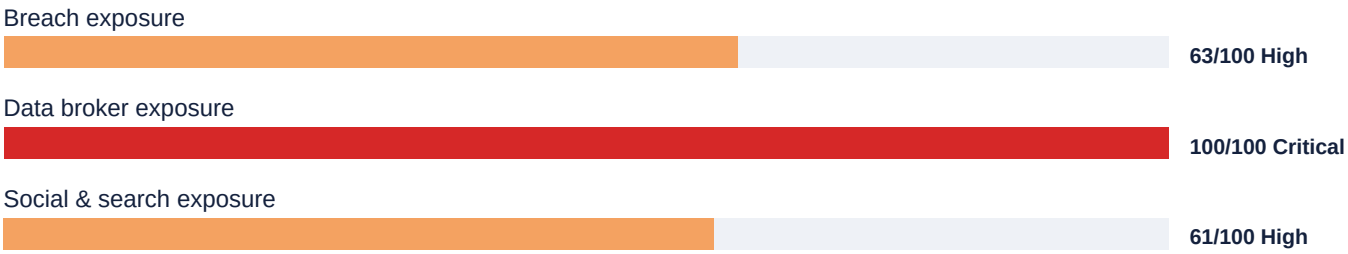
Breach, data broker, social and search exposure

Prepared for	Jordan Sample
Scan date	2026-10-27
Analyst review	A. Reviewer (2026-10-28)
Overall risk	74/100 - High
Consent reference	DEMO-0001

DEMONSTRATION DATA - all subjects, breaches and results are fictional.

1. Executive summary

Overall exposure for **Jordan Sample** is rated **High** (74/100). An automated scan produced 15 candidate findings; an analyst approved 15 and rejected 0 as false positives or not applicable.



Highest-priority findings

ID	Finding	Severity
DB-02	Listing on Whitepages	5 - Critical
DB-04	Listing on TruePeopleSearch	5 - Critical
BR-03	DemoFitness breach (2021)	4 - High

What this means

Approved findings by area: breaches 4, data brokers 6, social and search 5. Data broker listings and reused-password breaches drive most of the practical risk (stalking, identity theft, account takeover, targeted phishing). Section 7 sets out a 30/60/90-day plan.

2. Scope, methodology and limitations

Identifiers assessed

Type	Values
Name	Jordan Sample
Emails	jordan.sample@example.com, j.sample@example.org
Phones	555-0142
Usernames	jordansample88
Location	Springfield, IL

Method

1) **Automated scan**: breach lookups for each email, a checklist of people-search sites, and web searches on name, email, phone and usernames. 2) **Analyst review**: every finding is approved, rejected or re-scored by a human before it can enter this report. 3) **Scoring**: approved findings are weighted by severity per category (breach 40%, brokers 30%, social/search 30%).

Limitations

Breach data covers only publicly reported incidents. People-search sites change layouts and block automated access, so broker results depend on analyst confirmation. Search engines return a sample of results, not everything that exists. The dark web and private databases are out of scope. Absence of a finding is not proof of absence of exposure.

3. Breach exposure

4 breaches affect the assessed email addresses; 2 included passwords. Credential reuse is the most common route from a breach to account takeover.

ID	Finding	Severity	Recommended action
BR-03	DemoFitness breach (2021). j.sample@example.org appears in the DemoFitness breach. Exposed: Email addresses, Passwords, Dates of birth.	4 - High	Rotate the password on this service and anywhere it was reused; enable multi-factor authentication.
BR-01	ExampleForum breach (2019). jordan.sample@example.com appears in the ExampleForum breach. Exposed: Email addresses, Passwords, Usernames.	3 - Medium	Rotate the password on this service and anywhere it was reused; enable multi-factor authentication.
BR-02	SampleRetail breach (2023). jordan.sample@example.com appears in the SampleRetail breach. Exposed: Email addresses, Physical addresses, Phone numbers, Dates of birth.	3 - Medium	Treat the exposed fields as public; watch for targeted phishing.
BR-04	MockMarketing List breach (2020). j.sample@example.org appears in the MockMarketing List breach. Exposed: Email addresses, Names, Job titles.	2 - Low	Treat the exposed fields as public; watch for targeted phishing.

4. Breach analysis: what was exposed

Data types exposed across breaches

Data type	Breaches
Email addresses	4
Passwords	2
Dates of birth	2
Usernames	1
Physical addresses	1
Phone numbers	1
Names	1
Job titles	1

Interpretation

Passwords and dates of birth enable account takeover and identity verification fraud. Addresses and phone numbers feed data brokers and make targeted phishing or SIM-swap attempts more convincing. Exposed email addresses alone are low risk but confirm the address is active and traded.

Immediate hygiene

Use a password manager with unique passwords per site, enable app-based or hardware multi-factor authentication on email, banking and mobile carrier accounts, and add a carrier PIN.

5. Data broker exposure

6 confirmed listings on people-search sites. Brokers aggregate public records and purchased data, then resell it to anyone.

ID	Finding	Severity	Recommended action
DB-02	Listing on Whitepages. Listing includes current address and phone number.	5 - Critical	Submit an opt-out request to Whitepages and re-check in 30 days; brokers frequently re-list records.
DB-04	Listing on TruePeopleSearch. Free listing with address, phone, and relatives.	5 - Critical	Submit an opt-out request to TruePeopleSearch and re-check in 30 days; brokers frequently re-list records.
DB-01	Listing on Spokeo. Profile shows age range, home city, relatives, and two email addresses.	4 - High	Submit an opt-out request to Spokeo and re-check in 30 days; brokers frequently re-list records.
DB-03	Listing on BeenVerified. Report available with address history and associated people.	4 - High	Submit an opt-out request to BeenVerified and re-check in 30 days; brokers frequently re-list records.
DB-05	Listing on Radaris. Profile includes employer and past addresses.	3 - Medium	Submit an opt-out request to Radaris and re-check in 30 days; brokers frequently re-list records.
DB-06	Listing on MyLife. Public profile with reputation score and location.	2 - Low	Submit an opt-out request to MyLife and re-check in 30 days; brokers frequently re-list records.

6. Social and search exposure

5 results surfaced for the subject's identifiers. Severity rises when a result links several identifiers (name with email, phone or location).

ID	Finding	Severity	Recommended action
SS-03	u/jordansample88. Surfaced for query "jordansample88": Posts in local and hobby communities; 4 years of history.	3 - Medium	Tighten the profile's privacy settings or remove identifying details.
SS-04	Mailing list archive. Surfaced for query "jordan.sample@example.com": Email and phone 555-0142 appear in a public list archive.	3 - Medium	Request removal from the site owner and from search results if the page exposes personal data.
SS-05	Springfield 5K results. Surfaced for query "Jordan Sample" Springfield IL: Jordan Sample, 38, finished 212th.	3 - Medium	Request removal from the site owner and from search results if the page exposes personal data.
SS-01	Jordan Sample - Operations Manager | LinkedIn. Surfaced for query "Jordan Sample" Springfield IL: Springfield, Illinois. Operations Manager at Example Corp.	2 - Low	Tighten the profile's privacy settings or remove identifying details.
SS-02	Jordan Sample | Facebook. Surfaced for query "Jordan Sample" Springfield IL: Lives in Springfield. Public friends list and photos.	2 - Low	Tighten the profile's privacy settings or remove identifying details.

Risk register (all approved findings)

ID	Area	Source	Finding	Sev
DB-02	Data broker exposure	Whitepages	Listing on Whitepages	5
DB-04	Data broker exposure	TruePeopleSearch	Listing on TruePeopleSearch	5
BR-03	Breach exposure	Have I Been Pwned	DemoFitness breach (2021)	4
DB-01	Data broker exposure	Spokeo	Listing on Spokeo	4
DB-03	Data broker exposure	BeenVerified	Listing on BeenVerified	4
BR-01	Breach exposure	Have I Been Pwned	ExampleForum breach (2019)	3
BR-02	Breach exposure	Have I Been Pwned	SampleRetail breach (2023)	3
DB-05	Data broker exposure	Radaris	Listing on Radaris	3

SS-01	Social & search exposure	Social platform	Jordan Sample - Operations Manager | LinkedIn	2
SS-02	Social & search exposure	Social platform	Jordan Sample | Facebook	2

7. Remediation plan

Days 0-30: critical and high

Ref	Action
DB-02	Submit an opt-out request to Whitepages and re-check in 30 days; brokers frequently re-list records.
DB-04	Submit an opt-out request to TruePeopleSearch and re-check in 30 days; brokers frequently re-list records.
BR-03	Rotate the password on this service and anywhere it was reused; enable multi-factor authentication.
DB-01	Submit an opt-out request to Spokeo and re-check in 30 days; brokers frequently re-list records.
DB-03	Submit an opt-out request to BeenVerified and re-check in 30 days; brokers frequently re-list records.

Days 31-60: medium

Ref	Action
BR-01	Rotate the password on this service and anywhere it was reused; enable multi-factor authentication.
BR-02	Treat the exposed fields as public; watch for targeted phishing.
DB-05	Submit an opt-out request to Radaris and re-check in 30 days; brokers frequently re-list records.
SS-03	Tighten the profile's privacy settings or remove identifying details.
SS-04	Request removal from the site owner and from search results if the page exposes personal data.

Days 61-90: low and informational

Ref	Action
BR-04	Treat the exposed fields as public; watch for targeted phishing.
DB-06	Submit an opt-out request to MyLife and re-check in 30 days; brokers frequently re-list records.
SS-01	Tighten the profile's privacy settings or remove identifying details.

Ongoing: re-scan every 90 days; brokers frequently re-list removed records.

Analyst sign-off and appendix

Reviewed by **A. Reviewer** on 2026-10-28. All 15 automated findings were individually dispositioned.

Rejected findings

None.

Analyst notes on approved findings

None.
